

Project

# Abogabot

## Introduction

---

This document explains all of the requirements needed to create a web software for advocacy tasks. All descriptions are going to explain what tasks does the user and the administrator will perform.

## Software functions

---

Abogabot is going to be able to upload legal documents (such as demands) and make updates along with notification for the user and the administrator each time there is one.

### Technical requirements:

<i>No. Requirements</i>	Task	Description	Client
<b>01</b>	Registration	User must create a profile with information such as: <ul style="list-style-type: none"><li>• Full name</li><li>• Age</li><li>• Occupation</li><li>• Civil Status</li></ul>	User
<b>02</b>	Filling a demand	User is going to be able to fill his demand information and upload it to the platform.	User
<b>03</b>	Dashboard	Visual register of all documents uploaded and updated.	User and Admin.
<b>04</b>	Payment process	Payment interface goes after the user tries to upload a demand.	User
<b>05</b>	Payment confirmation	Dashboard for the Administrator.	Admin.

<b>06</b>	User demand document	After filling information for a demand, the Administrator will be able to download a .docx of the preview document.	User and Administrator
<b>07</b>	Updates in dashboard	Administrator can upload and make document updates on the process dashboard.	Admin.

**Important requirements:**

- All updates are going to send a notification to the user and the administrator e-mail.
- Dashboard needed for visual confirmation.
- Software must be responsive.
- Colors: Navy Blue and White
